

~~SECRET~~

10 - 16 August 1986

OC-CS

25X1 [] has been placed on Procurement Note (PN) 85 by OL. The PN placement is effective immediately and OL approval is required before any further contractual relationships can be undertaken.

OC-MPS

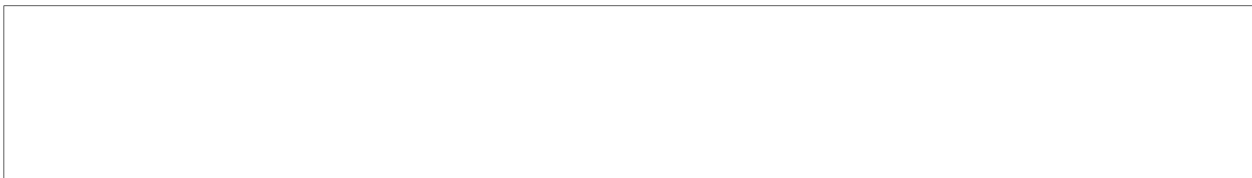

25X1 1. [] was reassigned on 12 August to the FND COMSEC officer position.

2. C/MPS met with senior OC management on 15 August to discuss proposed agenda items for the upcoming OC/OIT Joint Planning Conference scheduled for October. The proposed items will now be discussed with OIT and a final agenda developed.

OC-AMD

1. AMD recruitment representatives interviewed over 500 potential employees resulting in the issuance of over 200 PHS packages during recent trips through Massachusetts, Connecticut, Rhode Island, and North Carolina. On two occasions, AMD recruiters declined requests from local television and radio stations to participate in media controlled interviews.

2. The Phase II Report of the EPS Banding Survey has been completed by the Psychological Services Division of OMS. It contains recommendations that the bonus system for employees be clarified as to when and how bonuses will be used and their intended effects. The report also recommends that greater effort and emphasis be placed on performance feedback to employees. This report will be discussed at the D/CO's Executive Board Meeting on 26 August.

25X1

4. The second and final pilot running of the CRAFT System Administration training for TCOs has been completed and the course schedule prepared for 1987. Because training requests are still being received, it is anticipated that at least two more course presentations will be run prior to the end of 1986.

25X1

25X1

6. [redacted] an OL Career Trainee, has joined the staff of the Communications School Group's Instructional Support Department for a four-week interim training period.

OC-ED

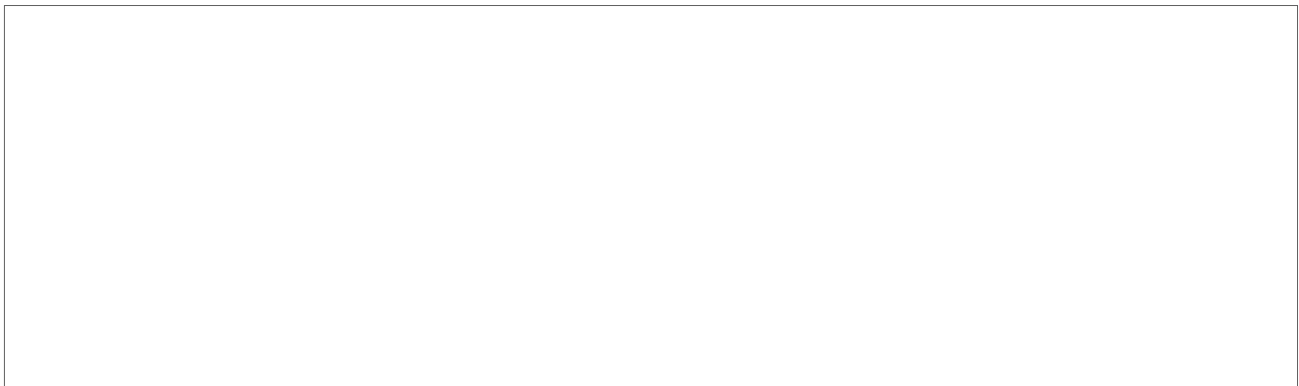

1. Software fixes were implemented for eight of the eleven packet switch and Packet Assembler/Disassembler (PAD) functions which failed during the recently completed MERCURY program Factory Acceptance Tests. A retest of these functions, as well as comprehensive regression testing, was then successfully completed. Software fixes for the three other tests that failed are still in process.

2. Chief, Systems Engineering Group meet with [redacted] of ORD on 13 August to discuss alternative power systems and their applicability to OC facilities. The discussions centered around the commercial advances in energy storage devices and their use for providing a load leveling capability. It was agreed that there was a sufficient overlap of capability and OC applicability to proceed further. [redacted] will contact vendors and obtain further information for a possible system power study.
